

BID NO. 603

**OXYGEN MACHINES FOR THE RESPIRATORY TEAM – BRONTE WARD  
£4,450**

The League of Friends received a bid from the Respiratory Team on Bronte Ward for two oxygen machines to be used to treat patients with humidified, high flow oxygen therapy. The system would be able to deliver high flow and humidified respiratory gases to spontaneously breathing patients and important in situations where piped air could not be provided, i.e. outside the main clinical areas.

The system was trialled on the ward with very positive feedback from patients, relatives and staff.
